AGENTTRAX
Keeping You On Track & On Time

AgentTRAX Online Application Spotlight

Integration Partners

agentTRAX is integrated with several title and escrow partners for the letterTRAX and jacketTRAX portions of the application suite.

▶ Integration allows for users to remain in their title and escrow software to request either a CPL or policy jacket through services provided by agentTRAX

▶ Integration eliminates the need to rekey information that is already contained in the escrow file

▶ Premium information is pulled from the escrow file and reported to FNTG's Agency Accounting department, eliminating the need to prepare a separate remittance report

▶ Many partners allow issued letters to be voided or issued jackets to be voided/edited or reinstated using the integration
